

HFS HORIZONS REPORT

# Salesforce Service Providers, 2025

An assessment of the leading service providers  
in Salesforce innovation

**Authors:**

Sam Duncan, Practice Leader  
Krupa KS, Senior Analyst

Excerpt for Publicis Sapient

“

Salesforce is at the forefront of transforming customer experiences as enterprises move from modular deployments to holistic transformation engagements. Now, generative AI (GenAI) and Agentforce have the potential to redefine how organizations interact with their customers, and enterprises are turning to service providers to make it a reality.

In response, leading service providers are working to quickly upskill their workforces, expand industry expertise, build stronger ecosystems, and embrace innovative ways of working to help enterprises get the most out of their Salesforce investments.

”

## Introduction and research methodology

## Introduction

Organizations of all sizes are increasingly prioritizing customer-centric approaches. This means a growing focus on real-time engagement, enhanced focus on data privacy, and developing new omnichannel experiences. To get there, enterprises often turn to service firms to help them plan, implement, and manage software-as-a-service solutions—including Salesforce.

- The **HFS Horizons: Salesforce Services, 2024** report assesses how well service providers are helping their Salesforce clients to embrace innovation and realize value across three distinct Horizons:
  - **Horizon 1:** The ability to drive functional optimization outcomes through cost reduction, speed, and efficiency.
  - **Horizon 2:** Horizon 1 + enablement of the OneOffice model of end-to-end organizational alignment across the front, middle, and back offices to drive unmatched stakeholder experience.
  - **Horizon 3:** Horizon 2 + the ability to drive the **OneEcosystem** synergy via collaboration across multiple organizations with common objectives around driving completely new sources of value.
- The report evaluates the capabilities of **19 service providers** across the HFS Salesforce services value chain based on a range of dimensions to understand the **why, what, how, and so what** of their offerings.
- It highlights the **value-based positioning** for each participant across the three distinct Horizons. It also includes **detailed profiles** of each service provider, outlining their **provider facts, strengths, and development opportunities**.
- The report is **global in scope** and offers critical insights for enterprises of all shapes and sizes, service providers offering Salesforce services, and ecosystem partners.

## Executive summary

1

### The leaders

HFS assessed 19 service providers across value propositions, innovation capabilities, go-to-market strategies, and market impact criteria. The leaders in Horizon 3 are Accenture, Cognizant, Deloitte, IBM, Infosys, Publicis Sapient, PwC, and TCS. These providers demonstrated their ability to help enterprises of all sizes drive ecosystem value, create new experiences, and develop 360-degree views of customers through Salesforce. There were a handful of shared characteristics among the leaders, including strong capabilities across the full Salesforce suite of products, deep expertise in key industries, a strong focus on innovation and co-creation with clients, and an established ecosystem of partners to pull into engagements.

2

### Enterprises still battle license costs

Enterprises are becoming increasingly cost-conscious as macroeconomic headwinds force them to prioritize their spending ruthlessly, and this is impacting Salesforce services expenditure too. One of the top priorities of 2024 was license optimization to reduce costs. Service providers are arming themselves with the tools to make this a reality, helping enterprises to analyze usage and ensure full use of features to drive down cost and extract maximum value from existing investments. This is particularly important as enterprises look to fund Salesforce Data Cloud and Agentforce investments.

3

### Industry-specific solutions continue to grow

Salesforce is driving the adoption of industry-specific solutions by launching Health Cloud and Financial Services Cloud, which allow enterprises to leverage tailored tools, workflows, and integrations designed for unique industry-specific applications. For example, Health Cloud helps firms create patient-centric experiences, while Financial Services Cloud offers compliance-ready tools and solutions. Service providers are complementing these solutions with deep domain expertise, their own tools and accelerators, and integrating emerging technologies such as automation and AI to accelerate implementation times and drive improved outcomes.

4

### AI as a transformative force in the ecosystem

Salesforce is embedding AI features into its own suite of products. Salesforce Einstein is a familiar name in the industry, and the company recently announced the Agentforce 2.0—a platform that delivers a 'limitless workforce' using AI agents. Service providers are already working to develop their own AI toolkits and upskill their existing talent to ensure they help enterprises navigate the rise of AI—some are even driving co-innovation with their clients. However, at the core of AI for Salesforce is Data Cloud, which pulls real-time data from multiple sources to feed tools such as Agentforce. We're seeing a significant rise in the number of enterprises seeking support for complex Data Cloud implementations, including data strategies, to ensure they are well-equipped to drive transformation with AI.

5

### Voice of the customers and partners

Enterprises across the board report satisfaction with their service providers' understanding of Salesforce's suite of products, service quality, and geographic reach. However, there was widespread agreement that the providers should focus on achieving more cost savings, developing deeper industry-specific expertise, and driving greater revenue impact for their clients. Partners have appreciated their strong execution capabilities but highlighted the need to enhance collaborative innovation and embrace ecosystems to drive more value for their enterprise clients.

## The HFS Salesforce services value chain

The HFS Salesforce Service Providers 2025 report looks beyond implementation and IT-centric use cases for innovation and transformation. Key aspects include transformational outcomes, industry-specific solutions, and innovative use cases, and therefore, we focus on the enterprise and service provider view.

Enterprise view	Enhanced customer relationships	Improved sales efficiency	Effective marketing campaigns	Customization and innovation	
	<ul style="list-style-type: none"> <li>360-degree customer view</li> <li>Community engagement</li> <li>Feedback collection</li> <li>Customer journey mapping</li> <li>Continuous improvement</li> </ul>	<ul style="list-style-type: none"> <li>Intelligent AI-driven insights</li> <li>Improved lead management</li> <li>Automated sales processes</li> <li>Opportunity management</li> <li>Sales forecasting and reporting</li> <li>Integration with marketing</li> </ul>	<ul style="list-style-type: none"> <li>Automated marketing campaigns</li> <li>Enhanced personalization</li> <li>Customer journey mapping</li> <li>Multi-channel engagement</li> <li>Advanced analytics and insights</li> <li>Intelligent targeting</li> <li>Integration with sales and servicing</li> </ul>	<ul style="list-style-type: none"> <li>Integration with other tools and applications</li> <li>Workflow automation</li> <li>Custom applications</li> <li>Agile development</li> <li>Training and support</li> </ul>

## Sources of data

This Horizons research report relies on multiple data sources to support our methodology and help HFS obtain a well-rounded perspective on the service capabilities of the participating organizations covered in our study. The sources are as follows:

### Briefings and information gathering

HFS conducted detailed **briefings** with Salesforce leadership from each vendor.

Each participant submitted a specific set of **supporting information** aligned to the assessment methodology.

### Reference checks

We conducted reference checks with **26 active clients and 20 active partners** of the study participants via surveys and interviews.

### HFS Pulse

Each year, HFS fields multiple demand-side surveys in which we include detailed vendor rating questions.

For this study, we leveraged our fresh-from-the-field HFS Pulse study data featuring **15 service provider ratings from Salesforce decision-makers at enterprises**.

### Other data sources

**Public information** such as news releases and websites.

**Ongoing interactions, briefings, virtual events**, etc., with in-scope vendors and their clients and partners.

## The study seeks to address multiple questions

### The future of Salesforce services

What is your vision for delivering Salesforce services in the future? How are you aligning it with broader ecosystem initiatives?

### Transformation focus

How do you help organizations capture value, such as improved customer experiences, by transforming their operations today?

### Industry-led solutions

What is your progress with industry-led solutions? What are the experiences?

What is on your roadmap?

### Change agents

How do you leverage change agents such as automation and AI while delivering Salesforce services?

### Outcome mindsets

What are the key outcomes you're helping enterprises achieve with Salesforce? How are you enhancing customer relationships and driving sales and marketing campaigns?

## Horizons assessment methodology: Salesforce service providers

The **HFS Horizons: Salesforce Services** report evaluated service providers' capabilities across a range of dimensions to understand the **why, what, how, and so what** of their Salesforce offerings. Our assessment is based on inputs from clients, partners, and employees and augmented with analyst perspectives.

← Assessment dimension (weighting) →

Assessment dimension	Assessment sub-dimension	Horizon 1 service providers	Horizon 2 service providers	Horizon 3 service providers
<b>Value proposition: The why?</b> (25%)	Strategy and roadmap	<ul style="list-style-type: none"> <li>Ability to drive <b>functional optimization outcomes</b> with selective Salesforce capabilities</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 1 +</li> <li>Ability to drive real <b>business, experience-led outcomes and stakeholder experiences</b> whilst achieving enterprise-wide transformations</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 2 +</li> <li>Ability to drive <b>ecosystem synergy</b> via collaboration across multiple organizations with common objectives around driving completely <b>new sources of value</b></li> </ul>
	Clarity of vision for Salesforce services and nature of outcomes			
	Differentiators—why clients work with you			
<b>Innovation capabilities: The what?</b> (25%)	Breadth and depth of services across the Salesforce value chain	<ul style="list-style-type: none"> <li>Strong <b>implementation capabilities</b></li> <li>Deep engineering capabilities driving speed and efficiency</li> <li>Offshore-focused with strong technical skills</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 1+</li> <li>Ability to support clients on their <b>end-to-end</b> Salesforce transformation journey</li> <li>Global capabilities with strong consulting and domain expertise across the Salesforce portfolio</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 2 +</li> <li>Strategy and execution capabilities at scale</li> <li>Leveraging Salesforce to create 360-degree views of customers to drive <b>new experiences</b></li> </ul>
	Strength of talent pool			
	Innovative solutions (industry-specific, ESG, etc.)			
<b>Go-to-market (GTM) strategy: The how?</b> (25%)	What transformative outcomes are you pitching to clients?	<ul style="list-style-type: none"> <li>Robust fundamentals of Salesforce transformation</li> <li>Technology and capability focus</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 1+</li> <li>Proven and leading-edge <b>proprietary assets</b>, including <b>industry-led solutions</b></li> <li>Clear <b>articulation of the transformation outcomes</b></li> <li>Capability to deliver end-to-end transformation with ongoing multi-year managed services</li> </ul>	<ul style="list-style-type: none"> <li>Horizon 2 +</li> <li><b>Driving co-creation with clients</b> and ecosystem partner</li> <li>Effectively <b>envisioning outcomes</b> and providing business assurance for Salesforce transformation</li> </ul>
	Nature of investments in your Salesforce business (M&A, training, R&D)

	Proven outcomes showcasing transformation			
	Voice of the customer			

# 2

## Market dynamics

## Our key learnings while conducting this study (1/2)

1

### **One-size-fits-all is no longer an option**

Salesforce implementations are becoming increasingly complex as enterprises operate with different levels of digital maturity, with individual challenges and desired outcomes. Service providers have been forced to evolve beyond standardized delivery models to ones with flexibility at the core and a deep understanding of each client's unique circumstances, for example, operating in heavily regulated industries. Salesforce recognized this with its new infrastructure, Hyperforce, which allows the use of major public clouds and enables enhanced flexibility among other benefits, meaning enterprises can drive incremental transformation with a tailored roadmap.

2

### **Pricing continues to be a top challenge**

Enterprises across the board expressed frustration around complex and opaque cost models, ranging from pay-as-you-go to tiered licensing models. For example, Agentforce is priced at \$2 per conversation. This remains a roadblock to transformation as enterprises struggle to justify further spending on the likes of Data Cloud and Agentforce until they optimize their current licensing costs. Savvy service providers are working with Salesforce to introduce outcome-based pricing. Others are combining tools such as Salesforce Optimizer with their own expertise to help clients maximize existing investments and align them to tangible business outcomes.

3

### **Data and AI are driving innovation**

Salesforce Data Cloud and Agentforce are two of Salesforce's flagship products, but they require significant investment in time and money before delivering maximum value. Enterprises rely on service providers to make this a reality, and forward-thinking firms are already reaping the rewards as they benefit from real-time insights and personalized customer experiences. Throughout our conversations with enterprises, we heard use cases ranging from automated content generation to conversational commerce and intelligent case management.

4

### **Industry-specific clouds continue to rise**

In response to the growing need for tailored solutions (see first point), Salesforce is developing its catalog of purpose-built clouds with industry-specific workflows, integrated compliance tools, and customer dashboards. Enterprises are turning to industry clouds to benefit from domain expertise, accelerated implementation times, and support with regulatory compliance, among a host of other unique benefits. However, enterprises tell us they still face challenges with additional license fees having complex cost structures, tricky integrations with their existing legacy systems, and customization issues that bring their own set of problems.

## Our key learnings while conducting this study (2/2)

5

### **Co-innovation is becoming a differentiator**

Enterprises are increasingly taking ownership of their technology initiatives rather than outsourcing them, which is why co-innovation is growing exponentially. It allows enterprises to jointly test and deploy customized solutions and bespoke applications and future-proof their infrastructure against upcoming technologies. Smart service providers are already establishing joint innovation studios with their clients, typically leveraging outcome-based models to explore exciting opportunities such as GenAI applications. While co-innovation is a differentiator today, we expect it to become commonplace in the Salesforce ecosystem if providers wish to remain competitive.

6

### **Sustainability and ESG initiatives are gaining momentum**

HFS's research indicates that sustainability and ESG initiatives are a priority for every enterprise, including Salesforce implementation. Salesforce made sustainability one of its core values and developed its own Sustainability Cloud for enterprises to track their carbon footprint and manage ESG data. Service providers are working to help enterprises improve their environmental impact by optimizing their tools and accelerators to be more eco-friendly and identifying opportunities to streamline operations for environmental efficiency.

Enterprises are largely satisfied with their providers, but partners struggle with commercial models, talent, and IP challenges

**Q: Please rate the provider’s expertise in executing the following Salesforce activities.**  
scale of 1 to 10, where 1 is poor and 10 is excellent; (Average rating)

## **Horizons results: Salesforce Service Providers, 2025**

## HFS Horizons: Summary of providers assessed in this report

Providers (alphabetical order)	HFS point of view
<b>Accenture</b>	One of the largest Salesforce service providers with strong investments in innovation
<b>Cognizant</b>	Bringing data and AI to enterprises through Salesforce
<b>Dextara Datamatics</b>	Inorganically growing its Salesforce practice for healthcare and manufacturing clients
<b>Deloitte</b>	Helping enterprises pivot from transactions to relationships
<b>Globant</b>	Strong LATAM presence with a focus on cost optimization and AI-enablement
<b>IBM</b>	Market-leading AI capabilities combined with a strong Salesforce relationship
<b>Infosys</b>	Deep Salesforce capabilities with AI and human-centric design at the core
<b>KPMG</b>	Bringing its partnership ecosystem and agile delivery to Salesforce services
<b>LTIMindtree</b>	Merger synergies unlocking significant growth potential for new and existing Salesforce clients
<b>Movate</b>	Pulling on its CX background and gig economy approach to deliver Salesforce services
<b>Mphasis</b>	Strong growth potential with a particular focus on BFSI
<b>NTT DATA</b>	Leveraging its global network to become a partner, not provider, for Salesforce services
<b>Persistent</b>	Bringing digital engineering to the Salesforce ecosystem
<b>Publicis Sapient</b>	Unlocking new doors with marketing relationships and strong Data Cloud expertise
<b>PWC</b>	Strong growth potential with a particular focus on BFSI
<b>Randstad Digital</b>	A flexible Salesforce service provider with a strong emphasis on talent and rapid deployments
<b>TCS</b>	Deep industry expertise with sheer size and scale making it an execution powerhouse
<b>Tech Mahindra</b>	A vertical-driven approach to delivering Salesforce services
<b>Virtusa</b>	Engineering-led Salesforce services with co-innovation at the core

HFS Horizons for Salesforce service providers (1 of 2)

Note: All service providers within a Horizon are listed alphabetically.  
Source: HFS Research, 2025

## HFS Horizons for Salesforce service providers (2 of 2)

### Horizon 3 service providers demonstrate

- Horizon 2+ the ability to drive an **ecosystem synergy** via collaboration to create completely **new sources of value**.
- Compelling thought leadership that helps clients articulate their North Star.
- Leveraging Salesforce's full range of capabilities to build a 360-degree view of customers to truly reimagine the customer experience.
- Enabling continuous innovation to help enterprises stay at the forefront of technology and transformation.
- Drive co-creation with clients as ecosystem partners.
- Referenceable and satisfied clients driving new business models with the partnership.

### Horizon 2 service providers demonstrate

- Horizon 1+ the ability to drive **real business, experience-led outcomes and stakeholder experiences** while achieving **enterprise-wide transformations**.
- Clear articulation of the transformation outcomes enabled by Salesforce.
- Global capabilities with strong consulting and domain expertise across the complete Salesforce portfolio.
- Capabilities to deliver end-to-end transformation with ongoing multi-year managed services.
- Proven and leading-edge proprietary assets, including industry-led solutions.
- Referenceable and satisfied clients for the ability to blend technology and business objectives.

### Horizon 1 service providers demonstrate

- The ability to drive **functional optimization** outcomes with selective Salesforce capabilities.
- Strong implementation and managed services partners.
- Offshore-focused with strong technical skills.
- Robust fundamentals of innovation and transformation enabled by Salesforce.
- Referenceable and satisfied clients for the ability to execute technology transformation.

## **Publicis Sapient profile: Salesforce Service Providers, 2025**

Publicis Sapient: Unlocking new doors with marketing relationships and strong Data cloud expertise

Strengths
<ul style="list-style-type: none"><li>• <b>Value proposition:</b> Publicis Sapient aims to be a different type of Salesforce partner thanks to its consumer-first mindset. It delivers strategy, design, and transformation with a marketing focus.</li><li>• <b>Key differentiators:</b> Publicis Sapient pulls on its strong relationships with marketing leaders and expertise in direct-to-consumer markets to bring unique perspectives and unlock new doors by targeting non-traditional buyers for Salesforce services, thereby generating new growth potential.</li><li>• <b>Technology innovation:</b> Publicis Sapient's capabilities have grown from being an early adopter of Data Cloud to being an early driver of Agentforce. It has already deployed agents in two tier-1 retailers and developed 40 cross-industry use cases, proving its early credibility with the tech.</li><li>• <b>Outcomes:</b> Publicis Sapient created a new e-commerce business, platform, and delivery model for a leading UK supermarket to enable digital growth while maintaining existing service levels.</li><li>• <b>Client and partner kudos:</b> Clients and partners compliment Publicis Sapient's domain expertise, partnership mindset, and storytelling ability, translating business needs into value pitches.</li></ul>

Development opportunities
<ul style="list-style-type: none"><li>• <b>What we'd like to see more of:</b> Continued momentum with Agentforce—Publicis Sapient has made early progress with GenAI. The firm should continue to invest in the technology to establish itself as a truly innovative partner.</li><li>• <b>What we'd like to see less of:</b> Publicis Sapient represents itself as a different type of partner. We recognize the benefit this can bring to enterprises, but we expect more success stories and client case studies to bring these claims to life.</li><li>• <b>Client and partner critiques:</b> Clients and partners want to see a more executive presence in deals and a better use of the relationships.</li></ul>

Partnerships	Clients
<b>Key partners:</b> Salesforce, META, Google, AWS, Epsilon	<b>Number of clients:</b> Not disclosed <b>Key clients:</b> ASDA, Pandora, Wingstop, UPS, The Container Store

Global operations and resources	Flagship internal IP
<b>Headcount:</b> Not disclosed <b>Delivery and innovation locations by major geo:</b> 59 globally <ul style="list-style-type: none"><li>• North America: 25 offices</li><li>• Europe and the Middle East: 20 offices</li><li>• India: 5 offices and delivery centers</li><li>• Asia: 9 offices</li><li>• 15 innovation labs globally</li></ul>	<ul style="list-style-type: none"><li>• Conversational Experience</li><li>• Total Commerce</li></ul>
